Electronics Component Inventory

Julian Vilfort | October 8 2026

A reference to the components, modules, cables, and accessories in the photographed storage bins. Each category lists the readable part numbers or values and the photo needed to locate them.

The inventory covers 25 photos. Repeated views of the same stock are consolidated. Entries identify bin labels; quantities and working condition are unrecorded. A question mark means the reading needs confirmation.

How to use the inventory

Photo references use the numeric portion of each filename. For example, 9677 means IMG_9677.jpeg. The two filenames with (1) are retained in the photo index. Values are listed individually within each group; they do not imply that every intermediate value is available.

Electrical ratings are included only where useful and clearly written. Select a physical component using its own markings and datasheet; the catalog preserves uncertain or unusual shelf labels rather than silently correcting them.

Category guide

Category	Contents
Boards and modules	Raspberry Pi, Arduino, interfaces, controllers, and prototyping boards
Sensors and displays	Temperature, Hall, light, current, distance, cameras, LEDs, and LCDs
Passive components	Resistors, capacitors, potentiometers, coils, and ferrite cores
Discrete semiconductors	Transistors, MOSFETs, JFETs, diodes, rectifiers, and thyristors
Integrated circuits	Analog ICs, memory, logic, counters, drivers, and filters
Connections and switching	Headers, connector families, sockets, cables, and switches
Power and accessories	Actuators, power supplies, transformers, hardware, and supplies
Verification and photo index	Uncertain labels and source filenames

Boards and modules

Group	Components or labels	Photo
Raspberry Pi	Raspberry Pi 5, 4B, and 3A+; additional bin labeled Raspberry Pi Model B / A+	9671(1)
Arduino	Arduinos; Arduino Components; Bluetooth LE for Arduino	9671(1)
Controllers	Controllers, models unspecified	9673
Interfaces	USB I/O; Level Shifters; SD Cards	9672
Display hardware	Arduino LCD; LCD components	9673, 9695
Motor electronics	Stepper Motor Driver; Servo … Drivers?	9695, 9691
Other modules	I/O Modules; Meter Modules	9690, 9678
Prototyping	SOIC Carriers; Solder Breadboards; circuit boards with binding posts visible alongside the bins	9669
Building system	LEGO components	9672
Unsorted ICs	ICs To Be Sorted; unrecorded part numbers in covered or unlabeled bins	9678

Sensors and displays

Group	Components or labels	Photo
Assorted sensors	Sensors, models unspecified	9671(1)
Temperature	TMP36 Temperature Sensor; LM134 Temp Sensor; DS18B… temperature sensors?	9678, 9681, 9690
Hall sensors	Hall Sensors; A1104 Hall Sensor	9678, 9675
Distance	Ultrasonic; Lidar	9672, 9673
Cameras	Pixie Cams, as written on the label	9673
Light detection	Light Sensors; Photo Detector; OP550 NPN Phototransistor; Photo Transistor	9672, 9676, 9695
Current	Current Sensors	9673
Electrical meters	Voltage Meters	9673
LEDs	RGB, Red, Green, Clear, Blue, Yellow, White?; IR; 7-Segment; LED Mounting?	9695
Optical coupling	Opto Isolators	9677
Other sensing parts	Thermistors / Photoresistors; thermistors?; microphones	9687, 9690
Optics	Lenses	9669

Resistors

The tables retain uncommon labeled values such as 27.5 Ω, 191 kΩ, and 420 kΩ. Power ratings, tolerances, and resistor construction are not established by these photos.

Values in ohms

Value group	Labeled resistance values in Ω	Photo
Below 0.51	0.01?, 0.05, 0.1, 0.12, 0.18, 0.2, 0.22, 0.39, 0.47, 0.5	9683
0.51 to 1.2	0.51, 0.56, 0.62, 0.68, 0.7, 0.75, 0.82, 0.91, 1, 1.1, 1.2	9683
1.3 to 3.3	1.3, 1.5, 1.6, 1.8, 2, 2.2, 2.4, 2.5, 2.7, 3, 3.3	9683
4 to 6.2	4, 4.3, 4.7, 5, 5.2, 5.6, 6, 6.2; two preceding labels are faint	9683
6.8 to 16	6.8, 7.5, 8, 8.2, 9.1, 10, 11, 12, 13, 15, 16	9684
20 to 39	20, 22, 24, 25, 27, 27.5, 30, 33, 36, 39	9684
40 to 75	40, 43, 47, 50, 51, 56, 60, 62, 68, 70, 75	9684
80 to 160	80?, 82?, 90, 91, 100, 110, 120, 125, 130, 150, 160	9684
180 to 360	180, 200, 220, 225, 240, 270, 300, 330, 350, 360?	9685
390 to 750	390, 400, 430, 470, 500, 510, 560, 600, 620, 680, 750	9685
800 to 910	800, 820, 900, 910	9685

Values in kilohms

Value group	Labeled resistance values in kΩ	Photo
1 to 1.5	1, 1.1, 1.2, 1.3, 1.5; following label is faint	9685
1.75 to 3.3	1.75, 1.8, 2, 2.2, 2.4, 2.5, 2.7, 3.0?, 3.3; other labels are covered or faint	9685
4.3 to 6.8	4.3?, 4.5, 5, 5.1?, 5.6?, 6.2?, 6.8?; other labels are covered or faint	9685
12 to 24	12, 13, 14, 14.7, 15, 16, 18, 20, 22, 24	9686
25 to 56	25, 27, 27.5, 30, 33, 36, 39, 43, 47, 51, 56	9686
60 to 130	60?, 62, 68, 75, 82, 91, 100, 110, 120, 130	9686
150 to 300	150, 160, 180, 191, 200, 220, 240, 250, 260, 270, 300	9686
330 to 750	330, 360, 390, 420, 470, 510, 560, 620, 680, 750	9686
820 and 910	820, 910	9687

Values in megohms

Value group	Labeled resistance values in MΩ	Photo
1 to 2.2	1, 1.1, 1.2, 1.3, 1.5, 1.6, 1.8, 2, 2.2	9687
2.4 to 6.2	2.4, 2.7, 3, 3.3, 3.6, 3.9, 4.3, 4.7, 5.1, 5.6, 6.2	9687
6.8 to 10	6.8, 7.5, 8.2, 9.1, 10	9687
Other stock	Resistor Networks; Misc 1% Ω	9687

Capacitors and potentiometers

Capacitance values are grouped by their labeled units. Duplicate values in adjacent bins are consolidated; distinct voltage labels are retained.

Capacitors in picofarads

Value group	Labeled capacitance values in pF	Photo
8.2 to 27	8.2, 10, 12, 15, 18, 20, 22, 27	9692
33 to 220	33, 47, 50, 56, 68, 82, 100, 120, 150, 220	9692
300 to 1800	300, 330, 390, 470, 560, 680, 820, 1000, 1200, 1500, 1800	9692
2000 to 4700	2000, 2200, 2700, 3300, 3900, 4700; one label is covered	9692
5000 to 8200	5000, 5600, 6800, 8200	9693

Capacitors in microfarads

Value group	Labeled capacitance values in µF	Photo
0.01 to 0.033	0.01 (103), 0.015, 0.018, 0.022, 0.033	9693
0.039 to 0.22	0.039, 0.047, 0.056, 0.068, 0.082, 0.1 (104), 0.15, 0.18, 0.22	9693
0.33 to 3.3	0.33, 0.47, 0.68, 1, 2.0, 2.2, 3.3; one intervening label is covered	9693
4 to 18	4, 4.7, 5, 6.5?, 6.8, 10, 14, 15, 18. The 6.5? bin has a second faint value.	9693
20 to 68	20, 22, 33, 47, 68; rightmost label is covered	9693
100 to 470	100, 150, 220, 330, 470; separate 470 µF 35 V bin	9695
680 to 18000	680, 1000, 2200, 4700, 6800, 18000	9695
Other stock	Variable Caps; Caps To Be Sorted	9695

Potentiometers and related stock

Group	Values or labels	Photo
Pots in Ω	10, 20, 50, 100, 200, 500	9687
Pots in kΩ	1, 2 (as written), 2.5, 5, 10, 20, 25, 50, 100, 200, 250, 500	9687
Pots in MΩ	1	9687
Accessories	Pot Adjusters; Pot Hardware / Knobs	9687
Other passive parts	Tuning Coils; Ferrite Cores; Magnet Wire	9690

Discrete semiconductors

Transistors and field effect devices

Stock group	Part numbers or labels	Photo
2N series first shelf	2N2219, 2N2222, 2N2243, 2N2905, 2N2907, 2N2946, 2N2950, 2N3053, 2N3055, 2N3904, 2N3906	9675
2N series second shelf	2N4393, 2N5061 SCR, 2N5457, 2N5458, 2N5460 / NTE326, 2N6027 Unijunction, 2N6507 SCR, 2N6515, 2N6520, 2N7000, 2N7002	9675
Other parts first cabinet	2SK3504-...; 911275 FET (as written); BC107, BC183, BC546, BC557, BD135, BD136, BF245A, IRF520	9675
Power and other devices	IRF530, IRF540, IRF9Z30, IRF9520/1?, IRF9540, IXTH6N50D2, J105, LD0701?, LM395, MJ2955, MPF102	9676
MPS and NTE series	MPS918, MPSH10, MPSH81, NTE108, NTE160, NTE123AP, NTE222, NTE/ECG462, NTE312, PN4117, PN4355	9676
Additional power devices	SPP04N80C3, SPP20N60C3, TIP30, TIP31B/C, TIP32C, TIP41, TIP42, 2SK2504, ZTX451, ZTX551	9676
Light sensitive devices	OP550 NPN Phototransistor; Photo Detector; Photo Transistor	9676, 9695
Thyristor	BT151 Thyristor	9676
Other stock	Misc Transistor; Transistor To Be Sorted; Heatsinks; TO3 Socket; Transistor Mounting Hardware	9676, 9677

Diodes and rectifiers

Group	Part numbers or labels	Photo
Germanium	1N270; 1N34A	9677
1N series	1N4001, 1N4002, 1N4004, 1N4005, 1N4007, 1N4148, 1N4448, 1N914, 1N5817	9677
Power rectifiers	6A05, 80EPS12, D06S60?, DSEI60-06A, ES2DA-13, ESAD39-06N, GBU-8D, KBP307, MBRB4030, MBRB735	9677
Additional diodes	MURS160T3, NTE109, NTE514, SR102, VA86SC10R	9677
Varactors	NTE/ECG610, NTE/ECG611, NTE/ECG612, NTE/ECG613, NTE/ECG614	9677
Zeners	Zener Diodes assorted; 2 V divider visible; Zener 9.1 V; Zener 5.1 V / 1N751...	9678
Unsorted	Diodes To Be Sorted	9678

The 1N4007 bin appears to say 1 A 700 V. This unusual rating is retained as a label reading, not an independently verified device specification.

Analog and mixed signal integrated circuits

Descriptions below follow the shelf labels. Covered bins are recorded in the verification register.

Group	Part numbers and label descriptions	Photo
Operational amplifiers	LM101/201/301; LF356 JFET Input; LM346/7 Quad Op Amp; LM747 Dual Op Amp; LM1458?	9681
Other op amps	OP17/27/37?; TL074 JFET Op Amp; TLC272 Dual Op Amp	9682
Comparators	LM119/219/319?; LM306; LM311; LM339 Quad Comparator; LM393 Dual Comparator	9681
Instrumentation amplifiers	EL8172; INA118	9681
Audio amplifiers	LM380 2.5 W; LM384 5 W; LM386; NE5532/3?; additional Audio … label covered	9681
Timers and PLLs	LM556 Dual Timer; LM565 Phase Locked Loop; LM567 Tone Decoder; CD4046 Phase Locked Loop	9681
Switches and multiplexers	CD4051/2/3 Analog Mux; CD4066 Quad Switch; DG211 (MUX label); DG301 Analog Switch	9681
Analog to digital conversion	ADC0801/5 8-bit ADC	9681
Transistor array	CA3600E Transistor Array	9681
Serial interface	ICL232 RS232 Tx/Rx	9681
References and regulation	LM385 Adjustable Voltage Reference; LM723 Voltage Regulator; MAX630 Step-Up Regulator; LTC1144 Charge Pump	9681
Regulator bins	+3.3 V, +5 V, +12 V, 15 V, positive adjustable, -5 V, LM7910 -10 V, -12 V, negative adjustable	9678
Part label requiring check	MAX72213? with LCD Power Reg description	9681
Filters	MAX7409 Switched Cap Filter; MF10CCN Switched Cap Filter; TLC14 Switched Cap Filter	9681, 9682
RF and signal circuits	MC1350 IF Amp; MC145447 Caller ID Demod; SA602A? Mixer/Oscillator; SL560C Low Noise Amp	9681, 9682
PWM controller	TL494	9682
MOSFET drivers	TC1411; TC1413	9682
Transistor driver	ULN20xx Darlington Driver	9682
Infrared interface	MCP2122? IR Encoder/Decoder	9681
Partial labels	LM39…; XR22…; several bins covered by storage tubes	9681, 9682

Memory and digital integrated circuits

Memory and CMOS logic

Group	Part numbers or labels	Photo
Memory categories	SRAM, DRAM, EPROM	9681
EEPROM	AT24C256 Serial EEPROM; AT28C64 8k×8 EEPROM	9681
ROM	M27C256; TC541000 OTP ROM	9681
Memory IC	74x189 64-bit RAM	9680
CMOS gates	CD4001 NOR; CD4011 NAND; CD4049 Inverter; CD4070 XOR	9680, 9681
CMOS sequential logic	CD4013 D Flip-Flop; CD4017 Decade Counter; CD4027 JK Flip-Flop	9680
CMOS analog switching	CD4016 Bilateral Switch; CD4051/2/3; CD4066	9680, 9681

74 series logic

The shelf notation 74x is preserved. The photos do not identify whether each stored device is LS, HC, HCT, or another logic family. Slash groups are retained as written rather than expanded into assumed part numbers.

Stock group	Part-number labels	Photo
Top shelf	74x00, 74x02, 74x03, 74x04, 74x05, 74x07/17, 74x08, 74x09, 74x10	9679
Second shelf	74x11, 74x13, 74x14, 74x15, 74x16, 74x20, 74x21, 74x25	9679
Third shelf	74x27, 74x30, 74x32, 74x34?, 74x37, 74x38, 74x40, 74x47/48, 74x51, 74x73	9679
Fourth shelf	74x75, 74x76, 74x85, covered XOR part number, 74x90/2/3, 74x109, 74x112, 74x123, 74x124	9679, 9680
Decoders and multiplexers	74x138, 74x139, 74x147/8, 74x151, 74x153, 74x154, 74x157/8	9680
Counters and registers	74x160/1/2/3, 74x164, 74x166, 74x169, 74x173, 74x174/5, 74x190/1, 74x193, 74x196/7	9680
Other second-shelf labels	74x221, 74x239, 74x240/1/2/3/4, 74x245	9680
Third-shelf labels	74x247/8/9?, 74x257/8, 74x273, 74x279, 74x280, 74x297, 74x299, 74x…63 Three-State Latch, 74x373/4	9680
Fourth-shelf labels	74x377/8/9?, 74x573, 74x574	9680

Connectors, cables, and sockets

Headers and connector families

Group	Labels	Photo
Terminal hardware	Screw Terminal Blocks; Screw Terminal …; Screw Term Headers; Wire Wrap Pins; DIN	9689
0.1 inch headers	Single-row straight; female single-row straight; single-row 90°; dual-row straight; dual-row 90°; female dual-row straight; additional female dual-row straight bin	9689
Other headers	2 mm Headers; Test Points	9689
Connector families	0.156 inch Connectors; AMP Mate-N-Lok 0.25 inch; Molex 0.2 inch Wire-to-Wire; Molex SL Family 0.1 inch	9689
Additional Molex bins	Molex 2.5 mm?; Molex 0.1 inch; other series labels too small for confident transcription	9689
IDC and contacts	AMP Dual Row 0.1 inch IDC; Socket Pins; Barrier Strip; Housing 0.1 inch Single Mixed/Unknown	9689
Audio and RF	RCA Plugs; 1/8 inch Plugs/Jack?; BNC …	9689
Power connections	Power Jacks, label reads 2 × 5.5 mm; Battery Holder; Power Connectors?	9669, 9690
Other connections	Wire Nuts	9695

Sockets and carriers

Group	Labels	Photo
DIP and IC sockets	14-pin DIP, 16-pin DIP, 18-pin DIP?, 20-pin IC, 24-pin DIP?; additional pin counts too faint to verify	9691
Transistor socket	TO3 Socket	9677
IC carriers	SOIC Carriers	9669
Miscellaneous	Shorting Blocks; A/V; 3D … label unclear	9691

Cables and wire

Group	Labels	Photo
Video	HDMI to HDMI; Micro HDMI to HDMI, with PiCam written beneath	9670(1)
USB	USB Cable A-B; USB 2.0 A-Male to Mini B; Micro USB; USB 2.0 A-Male to C-Male	9670(1)
Jumper leads	Male-to-Male; Female-to-Female; Female-to-Male	9672
Other wire	Magnet Wire; Ribbon Jumpers?	9690

Switches, power, and accessories

Switches

Group	Labels	Photo
SPDT	SPDT DID Labs?; SPDT Toggle; SPDT Pushbutton; SPDT Misc	9674
SPST	SPST Toggle; SPST Pushbutton	9674, 9673
Other pole configurations	DPDT; DP3T; DPST; 4PDT	9674
Other switch types	Rotary Switches; DIP Switches / Quad Slide Switches; general Switches bin	9674, 9677, 9673
Accessories	Switch Hardware; Shorting Blocks	9674, 9691

Power and actuators

Group	Labels	Photo
Power supplies	Raspberry Pi Power Supplies	9671(1)
Solar	Solar Cells; Solar Controllers	9691, 9695
Transformers	Power Transformer	9690
Motors and actuation	DC Gear Motors; Solenoids; Servos	9690, 9672
Pumps and humidification	Pumps; Humidifier	9673
Relays	Relay	9690
Audio parts	Audio; Speakers; Microphone	9672, 9690
Lighting	Light Bulbs; Lighting Parts	9691, 9690

Hardware and supplies

Group	Labels or visible items	Photo
Mechanical supplies	Feet; String; Twist-ems; Springs; Magnets	9669, 9690
Label supplies	Labels Short; Labels Long	9669
Optical parts	Lenses	9669
Mounting and cooling	Heatsinks; Transistor Mounting Hardware; Pot Hardware / Knobs	9676, 9677, 9687
Other stock	Copper Foil; Ceramic Resonators; Copper Sulphate?	9690
Frequency components	Crystals/Oscillators Below 12 MHz; Crystals/Oscillators 12 MHz and Up; Crystals Unknown	9691
Miscellaneous	IR Thermometer?; unclassified components in unlabeled bins	9691

Labels requiring confirmation

These entries remain tentative. Covered and unlabeled bins may contain additional parts beyond the named stock in this catalog.

Photo	Label or location	What needs checking
9683	Top left and bottom left resistor bins	0.01? and Jumpers?; two labels before 4 Ω; far-right top bin
9684	Fourth resistor shelf	80? Ω and 82? Ω; left edge of preceding shelf is cropped
9685	First and lower resistor shelves	360? Ω; 3.0? kΩ; 4.3?, 5.1?, 5.6?, 6.2?, 6.8? kΩ; remaining faint or covered values
9686	Left edge of 60 to 130 kΩ shelf	60? kΩ
9693	Mid and lower capacitor shelves	Covered bin after 1 µF; 6.5? µF and second value; rightmost lower label
9692	Bottom capacitor shelf	One bin between the 2200 pF bins and 2700 pF is covered
9695	LED and bottom shelves	White LED?; LED Mounting?; most lower bin labels are blank or unreadable
9675	Leftmost third shelf	2SK3504 suffix; 911275 FET is preserved as written
9676	Top transistor shelf	IRF9520/1?; LD0701?
9677	Power diode shelf	D06S60?; 1N4007 voltage label appears to say 700 V
9678	Zener and unsorted bins	1N751 suffix; assorted Zener divider labels beyond 2 V
9681	Analog IC shelves	LM119/219/319?, LM1458?, MAX72213?, MCP2122?, NE5532/3?; partial LM39… and Audio … labels; covered bins
9682	IC shelf	SA602A?; OP17/27/37?; cropped leftmost part; partial XR22… label
9679	Logic shelves	74x34?; covered XOR part number; some descriptions may conflict with part numbers
9680	Lower logic shelves	74x247/8/9?; 74x…63; 74x377/8/9?; covered bins
9689	Connector shelves	Molex series numbers and 2.5 mm? label; 1/8 inch Plugs/Jack?; BNC suffix; additional housing labels
9690	Miscellaneous shelves	DS18B…; Copper Sulphate?; Ribbon Jumpers?; Power Connectors?; other faint labels
9691	Mixed stock and sockets	IR Thermometer?; Servo … Drivers?; 3D … label; socket pin counts beyond 14 and 16; some lower labels
9674	SPDT bin	DID Labs? wording
9669	Power jack bin	Dimensions appear to read 2 × 5.5 mm; exact center-pin diameter unverified

Photo index

The filenames below identify the source views used throughout the inventory.

Photo filename	Main contents
IMG_9669.jpeg	Feet, labels, lenses, battery holders, jacks, SOIC carriers, breadboards

IMG_9695.jpeg	Large capacitance values, LEDs, LCD, motor driver

Robotics Components & Hackathon Quick Index

Appendix to *Electronics Component Inventory* (October 8, 2026). This page groups robotics-relevant parts already recorded in the photographed-bin inventory and adds hardware references from the Lunabotics motor-control documentation.

> **Inventory limits:** The source inventory records readable bin labels and photo numbers, but does not record counts or working condition. The software repository identifies hardware used or supported by a test platform; it does not confirm that each item is currently in the storage bins. Check labels, count parts, and verify operation before building.

Robotics parts recorded in the storage-bin photos

Use	Recorded components / labels	Photo refs
Compute and control	Raspberry Pi 5, 4B, 3A+, and Model B / A+ bin; Arduino boards and Arduino components; unspecified controllers; USB I/O; level shifters; SD cards; I/O modules	9671(1), 9672, 9673, 9690
Drive and actuation	DC gear motors; servos; stepper motor driver; possible servo drivers (label uncertain); solenoids; pumps; relay; motor-driver components	9690, 9672, 9695, 9691
Distance, vision, and sensing	Ultrasonic sensor; lidar; Pixie Cams; assorted sensors; current sensors; Hall sensors including A1104; temperature sensors (TMP36, LM134, possible DS18B…); light sensors and phototransistors; voltage meters	9672, 9673, 9675, 9678, 9681, 9690, 9695
Prototyping and wiring	Solder breadboards; circuit boards with binding posts; SOIC carriers; male-to-male, female-to-female, and female-to-male jumper leads; HDMI and USB cables; headers; screw terminals; Molex and other connector families; power jacks and battery holders	9669, 9670(1), 9672, 9689, 9690
Power and indicators	Raspberry Pi power supplies; solar cells and solar controllers; LEDs including RGB, single-color, IR, and 7-segment; capacitors and resistors of assorted labeled values; MOSFETs, transistors, diodes, and voltage regulators (see main inventory for part labels)	9671(1), 9675–9678, 9683–9687, 9691–9695
Mechanical / educational	LEGO components; lenses; heatsinks; transistor mounting hardware; switch hardware	9669, 9672, 9676, 9677

Additional hardware named in Lunabotics software documentation

Hardware	What the repository says	Hackathon check
Raspberry Pi (3B+ described)	Listed as a supported controller and part of the documented test robot.	Confirm model, power supply, SD card, and availability.
CANable USB-to-CAN adapter	Named as the SocketCAN adapter used with the test robot; documentation describes CandleLight firmware.	Confirm adapter is physically present, firmware, cable, and CAN wiring.
CTRE Talon SRX and Victor SPX CAN motor controllers	Drive-control source instantiates TalonSRX and VictorSPX devices. README says to connect Talons or another CTRE CAN device for validation.	These are software references, not a verified stock count. Confirm controller models, motors, CAN harness, and power.
roboRIO (optional in documented setup)	README says the test robot also has one, needed only in certain FRC-locked actuator cases.	Not needed for a basic Pi + CANable demo; physical availability unconfirmed.
Jetson Nano (supported setup)	README includes a Jetson Nano setup path.	Supported by the docs; not evidence of an in-stock unit.

Sources: original inventory photos indexed in the main PDF; repository files `src/motor-control-j/README.md` and `src/motor-control/src/motor-control.cpp`. Photo references use the numeric portion of each IMG filename.
